

# MULTIFUNCTIONAL TAPE CURTAINS

## Product description

Filumi Velto curtains produced in polish sewing company.

We introduce You curtains made of premium quality velvet - 100% polyester (210 gsm). Velvet fabric is semi-matte, durable, low stretch and soft and pleasant in touch. Our velvet curtains are semi-darkening (a blackout factor of 70%).

### Multifunctional tape (4 in 1)

The multifunctional tape we use allows you to hang the curtain both on rod or on ceiling/wall rail. The curtain can be hanged using snail hooks, metal pleat hooks, clips or directly on rod. One tape gives You the opportunity to achieve four different effects – **pencil pleat, triple pleat, wave, tunnel**. It's up to you which one you choose.

### Comfort and versatility

The curtain protects privacy of Your family well and provides slight darkening of the room. Create a good environment for sleeping and resting. The fabric not only looks attractive, but also blocks most of the sun's rays, protecting furniture and floors. The offered curtains fit perfectly into the bedroom, living room, hotel room and conference room.

### Additional information

- Due to properties of velvet fabric height and width have tolerance within +/- 2 cm.
- We care about high-quality stitching. The edges of the curtain are carefully finished, which guarantees durability. The bottom edge is finished with 7cm hem, which adds elegance.
- Wide range of colors – You can choose from 10 different, unique, modern colors : dark beige, light grey, charcoal, petrol (turquoise), bottle green, dark blue, light pink, cream, mustard, black.
- **Clips, hooks, sliders are not included to the product.**

## Measurement guidelines – adjust the curtain

### Measuring the width of the curtain on the multifunctional tape

1. Measure the width of the curtain rod/rail (the width the curtain is to cover)
2. Add to the width of the curtain rod/rail :
  - a. Pencil pleat effect – 100% of width
  - b. Triple pleat effect – 50-150% of width (it depends on pleat spacing and depth You want to have)
  - c. Wave effect – 50-150% of width (we suggest 100%)
  - d. Tunnel effect – 50-150% of width (we suggest 100%)
3. If You want to hang two curtains, divide the result by two and buy two pieces.
4. Choose a curtain with the closest width. Our available curtain widths are: 140, 200, 265, 400, 530 cm.

### Measuring the length of the curtain on the multifunctional tape

1. Snail hooks / clips / metal pleat hooks – measure the distance from the end of the sliders / rod rings to the place where curtain should end above the floor (we suggest 2-3 cm above the floor)
2. Directly on rod – measure the distance from the top edge of rod to the place where curtain should end above the floor (we suggest 2-3 cm above the floor) + add 2 cm (distance from rod to the top edge of the curtain)
3. Choose a curtain with the closest length. Our available curtain lengths are: 175, 225, 250, 270, 300 cm.
